

# BLACK PEARL CHARTERS NEWS

December 15

Merry Christmas and a Happy New Year, it's been a busy Month and the fishing has really started to heat up with kingfish and Snapper now being caught regularly on the West Coast. We have had good numbers of groper on the south and west with great Bluenose fishing at the trench when you can get there and that hasn't been a problem with this amazing spell of weather.

One thing I've noticed this season is the quantity of gurnard on the West Coast, it hasn't been uncommon for us to catch 20 or more gurnard while fishing for snapper. It's well worth a play with soft baits if you feel like doing something different while waiting for other fish to turn up.

We have also had some good catches of Warehou and have had a lot of fun targeting them on small lures and light tackle. A good place to target these around the foul or rocky structured places, Fishermans and hunters can be very productive.

All in all it's shaping up to be a great season, things are a little late this year but I'm confident we are heading in the right direction for a long summer.

Im now taking bookings for February, March, April and May our best fishing months!

Available dates in January are, I can do evening trips most days as well just ask

3rd Sole charter afternoon or share cost minimum 4  
5th 1x spot on an evening trip  
7th Sole charter available all day anytime trip or share cost minimum 4
